

# Hangmann service modules

Designed with flexibility in mind, the Ackermann Hangmann range of hanging service modules provide a portable and convenient means of distributing power, data and compressed air from overhead supplies.

## **Robust**

Housing is manufactured from high impact resistant polyamide, which is both flame retardant and chemical resistant. Suited for use in 'tough' environments, from garages and workshops to large-scale kitchens and educational establishments..

## **Wide range of modules for added flexibility**

Empty modules and a range of mounting plates and accessories, provide the user with the flexibility to assemble a hanging service module to suit their specific requirements. Alternatively, pre-assembled options are available to provide a quick and ready solution.

Combined power and compressed air modules provide the user with the option of accessing power and compressed air from a single source.

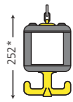

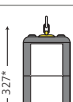

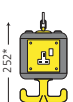

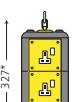

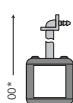

## **Suspension hook/bar**

Supplied with a suspension hook for ease of installation and suspension bar from which to conveniently hang tools.

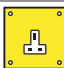

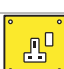

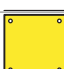

## **Overhead power**

Provides a safer working environment through a reduction in the number of cables running across the floor.
