Marco Cable Management is the trading name of Marco Gearing Limited.

Sales Hotline: 01248 72 57 72

Welcome to the second edition of the Marco Cable Management catalogue.

We are pleased to update our catalogue and introduce a number of new products and features ahead of schedule.

We are delighted with the progress Marco has made and thank those of you who have chosen to support us. If you have not tried Marco then we would encourage you to do so. We think you will be pleasantly surprised. Our intention is to meet your orders in full, and on time, by holding sufficient stocks for immediate shipment.

The Marco Apollo three compartment trunking ranges are now available to order in a wide variety of RAL colours in addition to the stock colours of white and charcoal. Please contact our sales office on 01248 725772 to discuss your requirements.

Apollo trunking is now also offered in component form for those of you who prefer to have three compartment trunking unassembled.

The Marco power pole is now available and feedback from the market has been very complimentary. As with all Marco products, our aim is to ship power poles from stock. You can read about some of the benefits the Marco power pole has to offer on page 6.

Marco bench trunking and bench trunking units are now shipping and full details of these ranges are on page 7. We can supply bench trunking pre-wired if required, and in addition to our standard product, Marco can provide other sizes to order.

The Marco wire cable tray range benefits from the introduction of two new sizes of 30mm x 50mm and 30mm x 300mm wire tray. The Marco quick coupler is a welcome addition to our range of wire tray accessories and helps to reduce tray installation times. Finally, we have introduced dividers for our 30mm, 55mm and 106mm depth wire tray ranges.

Thank you for your support.

We look forward to continuing to work with you to provide the products you want.

Terry Deakin Lillian MacGregor Ian MacGregor

Marco Apollo
dado & skirting trunking . . .

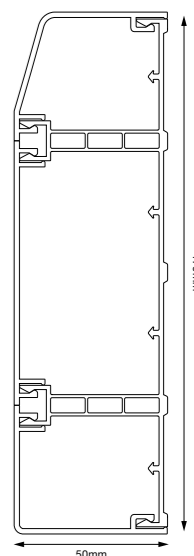

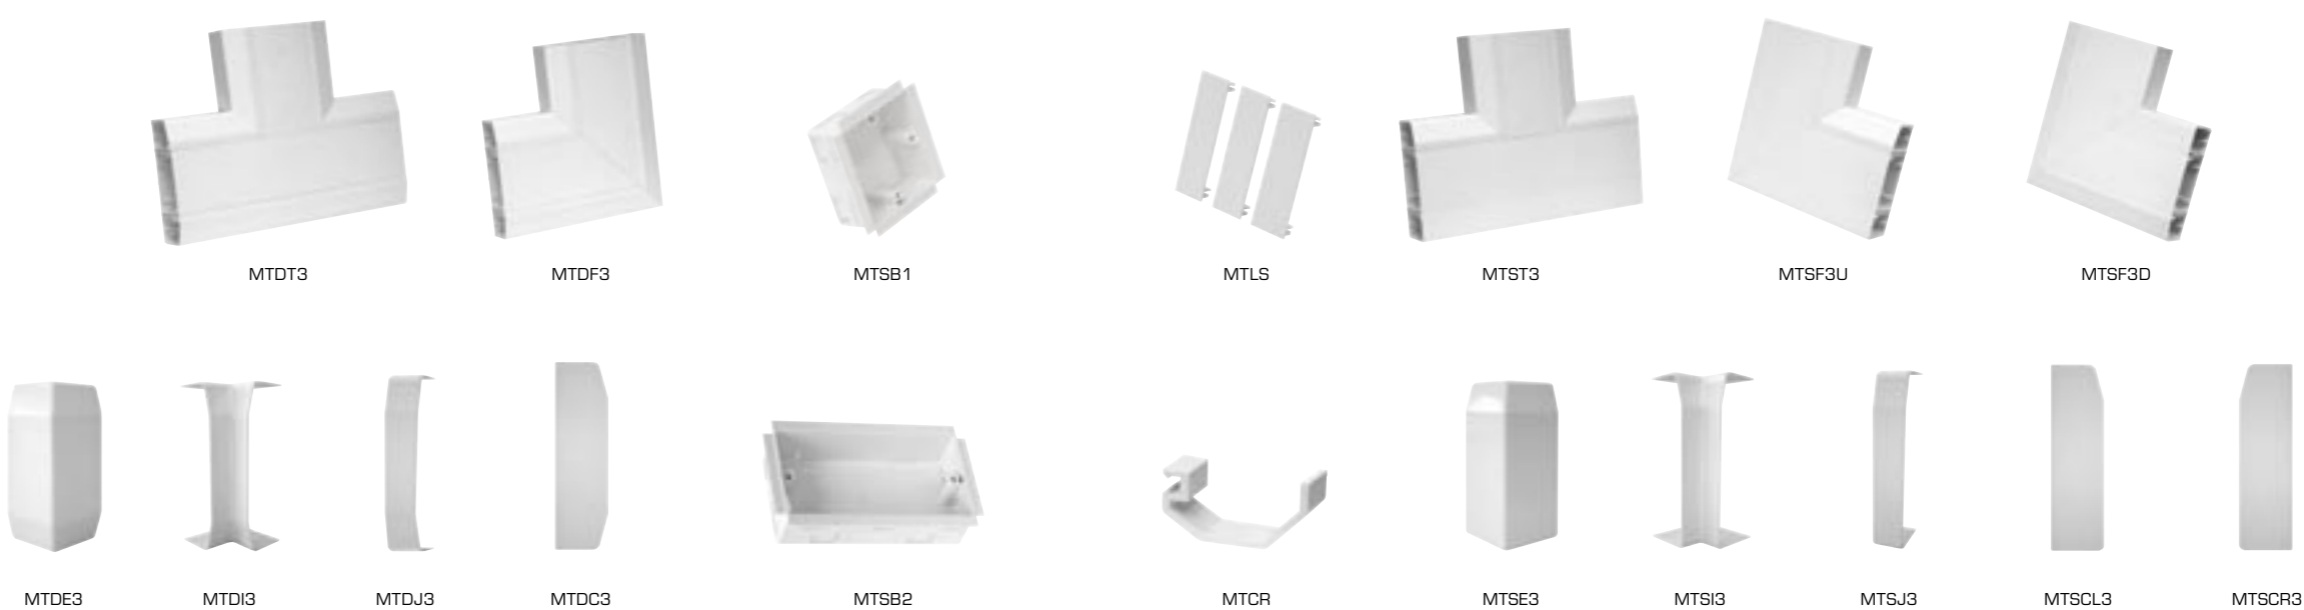

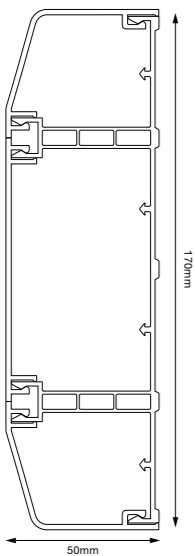

Marco Apollo trunking is a new modern design.

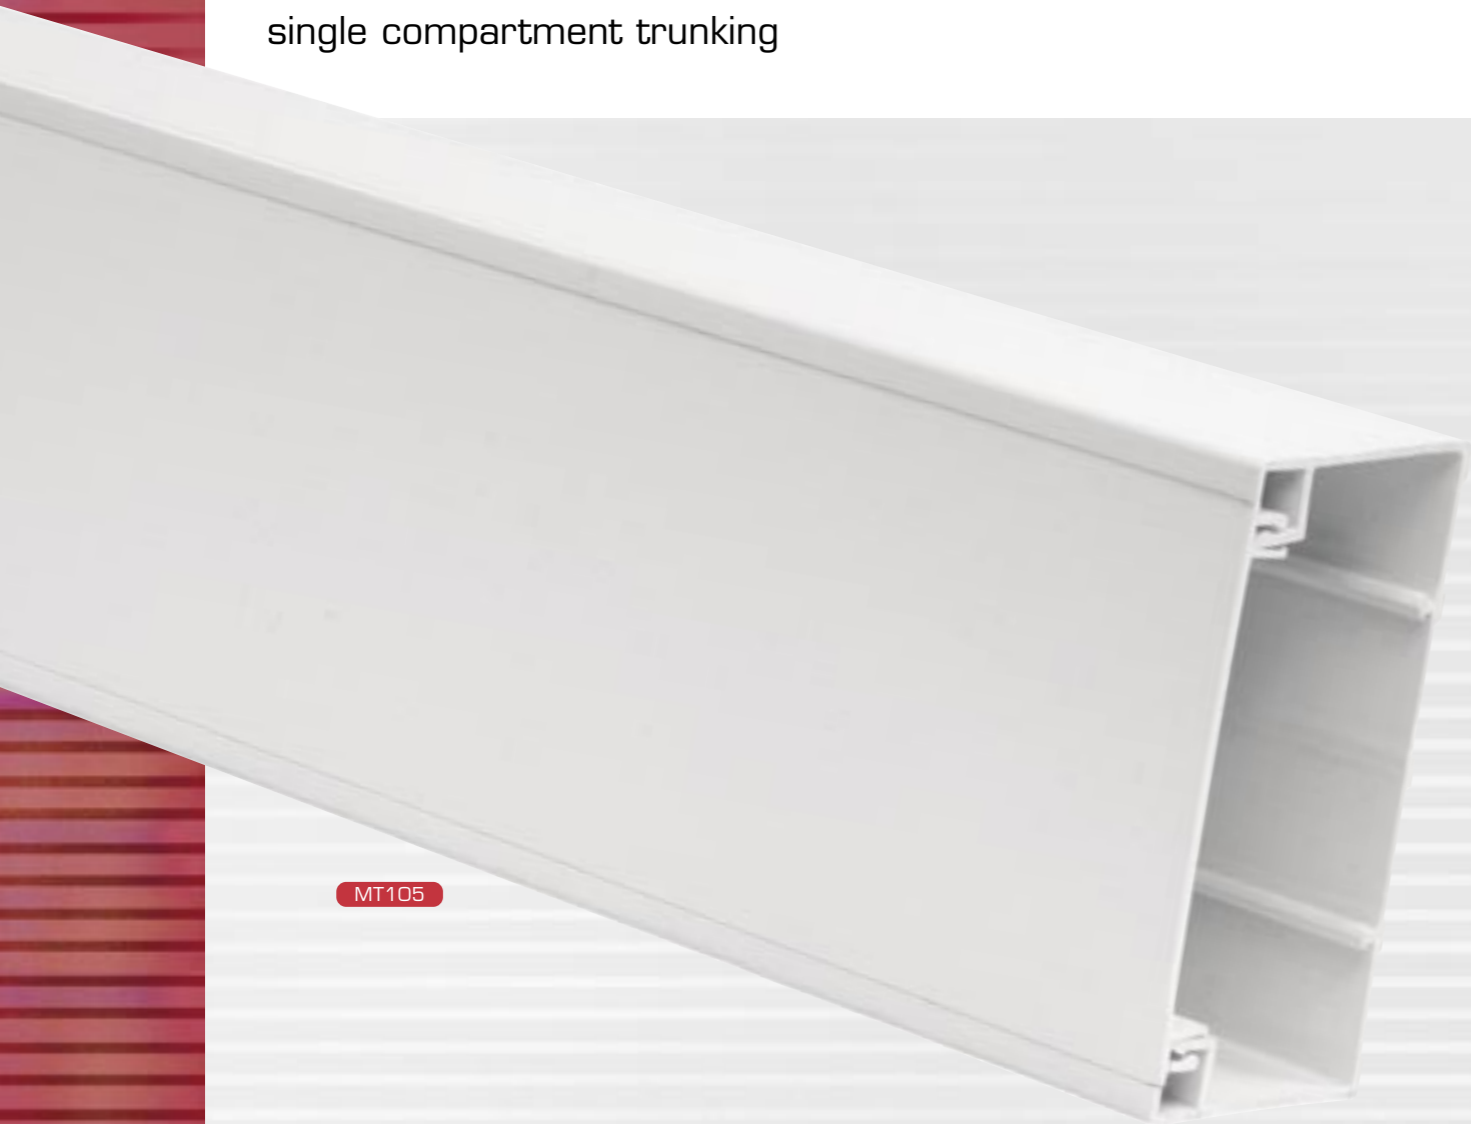

Available in both dado and skirting versions, Apollo trunking offers three separate compartments for power, data and telecommunication cables.

Marco Apollo trunking has a number of benefits for the installer to help keep installation times to a minimum. For instance, the outer compartments have been designed to provide the greatest possible capacity for data cables. All of the Marco socket boxes are 35mm deep to make the installation of accessories quick and easy, and have two push-outs on each side for effortless cable entry. The Apollo trunking base incorporates holes designed to capture the head of the fixing screw without having the need to use washers.

MT105

Marco Juno trunking . . .

Marco Juno is a single compartment trunking system, which can be subdivided by means of dividing strips to form up to three individual compartments for power, data and telecommunication cables.

Juno trunking accepts the standard Marco 1-gang and 2-gang socket boxes and is complemented by a full range of moulded one piece fittings which are easily clipped into place.

Power Pole

Marco power pole . . .

The Marco power pole has the benefit of a strong aluminium profile designed to retain its rigidity in all installation situations. The length of the power pole can be easily modified on site and a height adjusting locking mechanism is supplied. The Marco power pole benefits from 35mm deep socket boxes for quick and easy installation of accessories.

Each Marco power pole is supplied with 6 socket boxes, ceiling shroud, floor boot, accessory spacers to help speed installation, and 6 metres of uPVC divider. The aluminium extrusion has a satin anodised finish.

Marco bench trunking . . .

Marco bench trunking is made from a satin anodised aluminium base and a white uPVC lid. A full range of moulded and fabricated fittings are available, and the trunking can accept Marco socket mounting boxes at any point.

Marco bench trunking units . . .

Marco bench trunking units are available in 1-gang, 2-gang or combined 1 & 2-gang socket mounting boxes. Additional combinations can be supplied to order.

All bench trunking products can be supplied pre-wired. Please contact the Marco sales office on 01248 725772 for more information.

Marco Wire Cable Tray System

Wire Cable Tray heavy duty

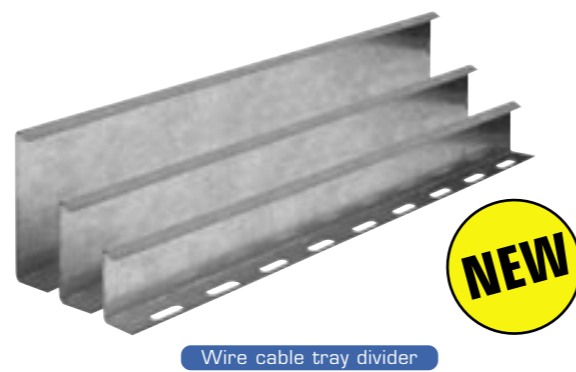

Wire cable tray . . .

Marco heavy duty wire cable tray is available in electro-zinc and hot-dipped galvanised finishes. It is offered in three depths - 30mm, 55mm and 106mm. A range of fittings is available to join and support the tray.

Marco wire cable tray is light in weight compared with conventional tray. Bends can easily be fabricated on site. The design of Marco wire cable tray enables it to be installed quickly, thereby reducing costs.

www.marcocableman.co.uk

Wire cable tray technical information is available on our web site.
